COVERAGE WINDOW

SELECTED PERIOD	FIRST RESPONSE	LAST RESPONSE	COMPARISON
Last 30 days	27 Jun 2026	26 Jul 2026	Previous 30 days

HOW TO INTERPRET THIS REPORT

- Visibility is the share of successfully analyzed AI responses that mention the tracked brand.
- Average position is calculated only for responses where the tracked brand is present; lower is better.
- Brand names are normalized case-insensitively before aggregation to prevent duplicate leaderboard entries.
- Engine, prompt, competitor, sentiment, and source metrics reuse stored response evidence; this export makes no new provider or LLM calls.
- Confirmed source brand presence is shown only when structured source metadata explicitly contains the tracked brand.
- Previous-period changes use the immediately preceding reporting window.

Response evidence appendix
